

## Find the Right Activity for Your Class

*Bold words highlight science curriculum connections.*

### Earthkeepers

**4th-5th grade**

**3 days in Fall + year-round classroom visits**

A non-residential earth education program, Earthkeepers helps students develop a positive personal relationship with the natural world through **outdoor experiences** and **conserving natural resources** while also teaching key ecological concepts such as **food chains, interrelationships,** and **cycling of earth resources.** To become Earthkeepers, students earn four keys representing Knowledge, Experience, Yourself and Sharing.

Students begin their Earthkeepers journey by spending three consecutive school days outdoors at Emily Oaks. Emily Oaks staff continue the Earthkeepers experience throughout the school year, visiting your classroom and providing materials to students.

Activities “Munchline Monitors” and “Connection Inspection” are included in the complete program. Typically only one class can be scheduled at a time. A detailed program brochure is available upon request.

## Enhance Your Curriculum

### Curriculum Standards

Each of our activities for school groups is aligned with the science curricula of local schools and meets at least one of the Illinois State Standards in Science/Common Core Standards.

### Children and Nature Movement

Various studies show that children benefit physically, mentally and emotionally from spending time outdoors. Place-based education also enhances classroom learning. Emily Oaks is a valuable local resource for children to play and learn in the natural world.

### Bilingual Classrooms

Please advise our staff how we can accommodate your bilingual students and families. Many of our activities can currently feature vocabulary words in Spanish.

### Apply for a Grant to Visit for Free!

Schools may apply annually for the Illinois Biodiversity Field Trip Grant, which is offered by the Illinois Department of Natural Resources to completely cover the cost of field trips to native Illinois habitats. Download the application at: [www.dnr.illinois.gov/education/Pages/grants.aspx](http://www.dnr.illinois.gov/education/Pages/grants.aspx)

## Plan Your Visit

### Scheduling

Reservations are required for all groups. Please make reservations *as early as possible*, but no later than one week in advance of the desired activity date. To schedule an activity, call Emily Oaks Nature Center at (847) 674-1500, ext. 2500. For more information, e-mail School Program Coordinator Jill Flaherty at [JFlaherty@skokieparks.org](mailto:JFlaherty@skokieparks.org).

### Group Size & Fees

Group size is limited to 30 participants per activity. Minimum fees apply to groups of 10 students or less. Payment is due at the time of your visit.

#### ON-SITE ACTIVITIES

<u>Skokie/Dist. 65</u>	<u>Out-of-District</u>
\$3.50/student	\$4.25/student
MINIMUM FEES	
\$35.00/class	\$42.50/class

#### CLASSROOM OUTREACH ACTIVITIES

<u>Skokie/Dist. 65</u>	<u>Out-of-District</u>
\$65/show	\$80/show

#### EARTHKEEPERS PROGRAM

<u>Skokie/Dist. 65</u>	<u>Out-of-District</u>
\$45/student	\$56/student
MINIMUM FEES	
\$450/class	\$560/class

### In the Event of Rain...

Please note that when on-site activities take place outdoors, no alternative indoor activities are available in the event of rain or inclement weather. We will do our best to reschedule your visit should you need to cancel due to weather.

### Lunch

Groups may bring lunches and eat at tables located in the playground, though picnicking is not permitted within the Nature Center.

## About Emily Oaks Nature Center

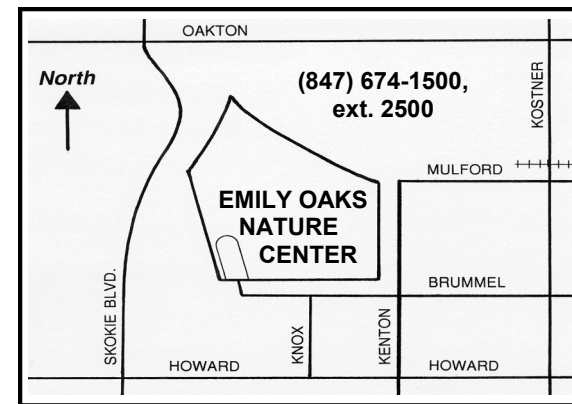

### Philosophy of Earth Education

Our educational programs follow the principles of Earth Education, which is the process of helping people live more joyously and harmoniously with the natural world. Our dynamic staff create engaging outdoor learning adventures that motivate students to actively pursue these outcomes:

- Understanding key ecological concepts
- Developing positive feelings for the natural world
- Promoting lifestyles that are more in harmony with the earth and its life

### Native Illinois Habitats & Species

Emily Oaks Nature Center is a natural oasis in a suburban setting, featuring pond, prairie, and woodland habitats. Native plant and animal species thrive here, including a variety of wildflowers, grasses, trees, reptiles, mammals, amphibians, birds and fish.

## Find the Right Activity for Your Class

*Bold words highlight science curriculum connections.*

### Mousewalk

**Preschool (ages 3-4)** ¾ hour  
*Fall, Winter, Spring*

Explore and play outdoors, after being transformed into a mouse! We will be busy making a mouse house, finding mouse food and hiding from foxes—just like the real animals living in the woodland. *Two classes can be scheduled at the same time.*

### Time for Wonder

**Preschool-Kindergarten** 1 hour  
*Fall, Spring*

When the clock sounds, it is time to touch, see, hear or smell the wonders in the woodland. Guided by an Emily Oaks Timekeeper, you will use special tools in four fun activities designed to develop **sensory awareness** of the natural world. *Two classes can be scheduled at the same time.*

### Welcome to the Woodland

**Preschool-Kindergarten** 1 hour  
*Fall, Spring*

Get to know this special **habitat** by visiting with our woodland puppet friends! Grasshopper, Tree, Squirrel and Wildflower are waiting to make your acquaintance and will help you explore their exciting home, the woodland. *Classes can be scheduled at 30-minute intervals.*

### That's a Living Thing!

**Kindergarten-1st grade** 1½ hours  
*Fall, Spring*

Discover the **characteristics and needs of living things**. Prepare a plate with an animal's favorite foods, listen to a "Breath-O-Meter," and chart **plant and animal life cycles**. Then sing the "All Living Things" song as we **explore the woodland** in search of living plants and animals. *Classes can be scheduled at 30-minute intervals.*

### Groundhog's Winter Tale

**Kindergarten-2nd grade** 1½ hours  
*Winter*

Visit a 5-foot-tall, talking groundhog to hear **Groundhog's life story**, then head outdoors to **explore the woodland in winter**. Look for plants under the snow, visit Groundhog's burrow, and use the sunshine to make your own predictions about the coming of spring. *Classes can be scheduled at 30-minute intervals.*

### Robin & the Recyclables

**Kindergarten-2nd grade** ¾ hour  
*Fall, Winter, Spring*

Help Robin learn **how and why we recycle** in this entertaining puppet show. Follow each **recyclable item** (including plastic, paper, metal, and glass) on its round-trip journey from the manufacturer to the recycling bin and back again! The show concludes with an interactive recycling activity. *This activity takes place indoors.*

Can also be scheduled as outreach at your school!

### Fledge's Springtime Story

**1st-2nd grade** 1¼ hours  
*Spring*

Play along with the **life-cycle** adventure of Fledge, a baby Red-winged Blackbird who lives in the marsh **habitat**. Interactive games illustrate how **birds claim a territory**, find a mate, build a nest, and care for their young. *Classes can be scheduled at 30-minute intervals.*

### Earthwalk

**1st-2nd grade** 1 hour  
*Fall, Winter, Spring*

Reawaken your **senses** on an Earthwalk in the woodland! Use Rainbow Chips to see incredible colors outdoors, share Prickly and Tickly touches with a friend, and Scratch 'n Sniff the wonderful smells outdoors, among other activities. *Two classes can be scheduled at the same time.*

### Meet Wind & Thundercloud

**1st-2nd grade** ¾ hour  
*Fall, Winter, Spring*

Wind and Thundercloud will share their roles in the amazing world of **weather and air**! Find out how wind and thunderstorms are formed through interactive science demonstrations and a story about the **water cycle**. Then learn how to be safe during threatening weather conditions. *This activity takes place indoors.*

Can also be scheduled as outreach at your school!

### Sun, Seeds & Salads

**1st-2nd grade** 1½ hours  
*Fall, Spring*

Explore the wonders of plants! Learn about the **parts of a plant**, and find out what **plants need** to live and grow. Eat a plant snack, give special gifts to Grandma and Grandpa Tree in the woodland, and plant your own vegetable seeds to watch the **plant life cycle** at home! *Classes can be scheduled at 30-minute intervals.*

### Keys to Life

**3rd grade** 1½ hours  
*Fall, Spring*

Discover the four key elements of an **ecosystem** that make **plant and animal life** possible. See a student-sized drop of water, participate in the Great Air Exchange, discover the benefits of sun energy, and enjoy a soil banquet as you learn about the Keys to Life! Then unlock the Life Box to find out what's inside. *Two classes can be scheduled at the same time.*

### Munchline Monitors

**3rd-4th grade** 1¼ hours  
*Fall, Spring*

Investigate **food chains** at Mama Nature's Munch Room! Here you will train to become a "Munchline Monitor," **exploring the woodland** for evidence of sun, plant and animal munchers, and assembling food chains found in Munch Bags. *Only one class can be scheduled at a time.*

### Home Sweet Home

**4th-5th grade** 2 hours  
*Fall, Spring*

Become a **native Illinois plant or animal** with a specific **job and habitat needs**, then set out with the Mayor to find a community in which to live. Visit the Emily Oaks pond, prairie, and woodland to learn about their **unique habitat features**. But when the marsh changes into a field, some plants and animals must find new homes. Form a community jury to decide the fate of the Web-footed Bug Bagger and others! *Classes can be scheduled at 30-minute intervals.*

### Connection Inspection

**4th-5th grade** 1½ hours  
*Fall, Spring*

Lock yourself into the intricate **web of life**! Take on the role of a **native Illinois plant or animal**, and connect to your needs for energy, soil, air and water in the **ecosystem**. Learn to recognize the countless **interrelationships** between living things and their environment. *Only one class can be scheduled at a time.*

### Solarville

**5th-6th grade** 1½ hours  
*Fall, Spring*

Journey from the sun to the earth, where you'll have lunch in Solarville. While ordering your pizzas, you will discover the energy involved in **food chains**, food production and transportation, including **solar energy** and **fossil fuels**. Because sunlight energy is not taken for granted in Solarville, you must **use energy resources wisely** to pay for the true costs of your pizza! There is an additional fee for pizza lunch, if eaten on-site. *Only one class can be scheduled at a time.*
